Bachelor of Science in Computer Science	Harding University	1996

LANGUAGES

English and Spanish	Bilingual
---------------------	-----------

PROJECT SUMMARY

About 80% of the projects I have delivered have been software development projects and the other 20% infrastructure projects. Most of the projects used a Waterfall approach while the rest were a hybrid approach between Scrum and Waterfall. Within the software development projects there were web application or SAAS projects where front end development used the most popular front end frameworks and backend development took place mainly in Java and C#. For the infrastructure projects there could be a combination of Azure servers or on premise servers as well as network equipment.

Overall Skills

Project/Program/Product Management	Communication	Scrum	Jira
TFS	Stakeholder Management/Coordination	Scope Management	Budget Management
Risk Management	Documentation Creation	Delivery Coordination	Project Planning
Governance and Compliance	Dependency Management	Progress Tracking and Reporting	Microsoft Project
Sprint Planning	Knowledge Transfer/Training	Customer Engagement	Microsoft Office
Teams	Zoom	Time Management	Agile
Waterfall	Hybrid Approach	Team Leadership	ITIL
